Engineering in Medicine

Volume 14 1985

Author Index

Andersen, K. Experimental measurement of rotatory and translatory instability of the knee joint, 123
Aspden, R.M. A model for the function and failure of the meniscus, 119

Bahrani, A.S. A preliminary study of the effects of medio-lateral rotation on stresses in an artificial hip joint, 39
Bowker, P. A study of the feasibility of using adhesive tapes for the long-term relief of tension from healing surgical wounds, 199
Bünger, C. Bone mineral assay: its relation to the mechanical strength of cancellous bone, 79

Carus, D.A. A description of a versatile microcomputer-based system for the clinical measurement of hand strength, 137
Chamberlain, M.A. (Book Review) *Electronic devices for rehabilitation*, by J.G. Webster, A.M. Cook, W.J. Tompkins, and G.C. Vanderheiden, 157
Chatham, R. Theoretical determination of damage risk criteria for impulse noise, 161
Churches, A.E.
The Oxford External Fixator: fixator stiffness and the effects of bone pin loosening, 3
Fracture healing assessment with external fixation, 13
An engineering evaluation of the Oxford External Fixator with sliding clamps: fixator stiffness and fracture healing assessment, 21
Costarella, B.R. Evaluation of oral water irrigation devices, 141
Crawford, R.J. Automatic measurement of walking speed and stride length, 101

Dall, D.M. An experimental study of femoral cement stress in total hip replacement – influence of structural stiffness of the femoral stem, 133
Deland, J. Design of intramedullary femoral stems using computer graphics, 89
Djurhuus, J.C. Bone mineral assay: its relation to the mechanical strength of cancellous bone, 79
Dul, J. Simulation of tendon transfer surgery, 31

Ellis, M.I. A comparison of knee joint and muscle forces in women 36 weeks pregnant and four weeks after delivery, 95

Gary, A. Design of intramedullary femoral stems using computer graphics, 89
Gill, J.M. A study of the feasibility of using adhesive tapes for the long-term relief of tension from healing surgical wounds, 199
Gillespie, G.T. Automatic measurement of walking speed and stride length, 101
Gore, T.A. Measurement of movement in hip joint disease, 179
Green, N.E. Simulation of tendon transfer surgery, 31
Gwillim, J. Fracture healing assessment with external fixation, 13

Harris, J.D.
The Oxford External Fixator: fixator stiffness and the effects of bone pin loosening, 3
An engineering evaluation of the Oxford External Fixator with sliding clamps: fixator stiffness and fracture healing assessment, 21
Haskard, D.O. Measuring devices for studying joint mobility in the normal population, 75
Haslock, I. A microcomputer controlled hand assessment system used for clinical measurement, 191
Hennedy, J. A description of a versatile microcomputer-based system for the clinical measurement of hand strength, 137
Higginson, G.R. Measurement of movement in hip joint disease, 179
Hvid, I.
Bone mineral assay: its relation to the mechanical strength of cancellous bone, 79
Experimental measurement of rotatory and translatory instability of the knee joint, 123
Material properties of cancellous bone in repetitive axial loading, 173

Jain, A.S. A description of a versatile microcomputer-based system for the clinical measurement of hand strength, 137
James, W.V. A preliminary study of the effects of medio-lateral rotation on stresses in an artificial hip joint, 39
Jensen, N.C.
Bone mineral assay: its relation to the mechanical strength of cancellous bone, 79
Material properties of cancellous bone in repetitive axial loading, 173
Jones, A.R. A microcomputer controlled hand assessment system used for clinical measurement, 191

Kesavan, S.K. Evaluation of oral water irrigation devices, 141

Linde, F. Material properties of cancellous bone in repetitive axial loading, 173
Little, E.G.
A static experimental analysis of a single plateau of the Geomedic® knee joint using embedded strain gauges, 69
Compressive creep behaviour of irradiated ultra high molecular weight polyethylene at 37°C, 85

Martin, C.J. The influence of environmental factors on evaporation and heat loss from burned tissue, 47
Mason, E.A. Report of a workshop on biosensors in medicine, 24–25 November 1983, 55
Miles, A.W. An experimental study of femoral cement stress in total hip replacement – influence of structural stiffness of the femoral stem, 133
Muir, I.F.K. The influence of environmental factors on evaporation and heat loss from burned tissue, 47
Nielsen, S. Experimental measurement of rotatory and translatory instability of the knee joint, 123

Orr, J.F. A preliminary study of the effects of medio-lateral rotation on stresses in an artificial hip joint, 39

Ranu, H.S.
Time dependent response of human intervertebral disc to loading, 43
Biomedical engineering at the Louisiana Technical University, 147
Reddy, N.P. Evaluation of oral water irrigation devices, 141

Sandford, M.H. Automatic measurement of walking speed and stride length, 101
Scholten, P.J.M. The influence of spine geometry on the coupling between lateral bending and axial rotation, 167
Seedhom, B.B. A comparison of knee joint and muscle forces in women 36 weeks pregnant and four weeks after delivery, 95

Shiavi, R. Simulation of tendon transfer surgery, 31
Silman, A.J. Measuring devices for studying joint mobility in the normal population, 75
Sølund, K. Bone mineral assay: its relation to the mechanical strength of cancellous bone, 79
Stevens, J. Measurement of movement of hip joint disease, 179

Tanner, K.E.
The Oxford External Fixator: fixator stiffness and the effects of bone pin loosening, 3
Fracture healing assessment with external fixation, 13
An engineering evaluation of the Oxford External Fixator with sliding clamps: fixator stiffness and fracture healing assessment, 21
Tomita, Y. A new equipment to measure the viscoelastic properties of soft materials and its application to articular cartilage, 127
Turner-Smith, A.R. Conference Report. Third International Symposium on Surface Topography and Spinal Deformity, Oxford, 27 and 28 September 1984, 107

Unsworth, A. A microcomputer controlled hand held assessment system used for clinical measurement, 191

Veldhuizen, A.G. The influence of spine geometry on the coupling between lateral bending and axial rotation, 167

Walker, P.S. Design of intramedullary femoral stems using computer graphics, 89
Wright, V.
A comparison of knee joint and muscle forces in women 36 weeks pregnant and four weeks after delivery, 95
New materials in biomechanics – bones, joints, and teeth, 117

Subject Index

Titles of papers are shown in bold type

A comparison of knee joint and muscle forces in women 36 weeks pregnant and four weeks after delivery, 95
A description of a versatile microcomputer-based system for the clinical measurement of hand strength, 137
A microcomputer controlled hand assessment system used for clinical measurement, 191
A model for the function and failure of the meniscus, 119
A new equipment to measure the viscoelastic properties of soft materials and its application to articular cartilage, 127
A preliminary study of the effects of medio-lateral rotation on stresses in an artificial hip joint, 39
A static experimental stress analysis of a single plateau of the Geomedic® knee joint using embedded strain gauges, 69
A study of the feasibility of using adhesive tapes for the long-term relief of tension from healing surgical wounds, 199
Adhesive tapes, feasibility of, for long-term relief of tension from healing surgical wounds, 199
Advanced teaching by television, 66
Amperometric biosensors, 60
An evaluation of the Oxford External Fixator with sliding clamps: fixator stiffness and fracture healing assessment, 21
An experimental study of femoral cement stresses in total hip replacement – influence of structural stiffness of the femoral stem, 133
Analyser, moving image, 111
Articular cartilage, 127
Artificial hip joint, stresses in, 39
Artificial limbs, 'skin' for, 111
Automatic measurement of walking speed and stride length, 101
Axial loading, repetitive, 173

Biological compounds, clinical analysis of, 60
Biomechanics, new materials in, 117
Biomedical engineering at the Louisiana Technical University, 147
Biomedical transducers for *in vivo* measurements, 61
Biosensors:
amperometric, 60
current devices and limitations, 59
Biosensors in medicine:
a technical overview of the problem and needs, 59
report of a workshop on, 55
the problems and needs: a medical overview, 58
Blood electrolyte cations, clinical analysis of, using microelectronic chemical sensors, 59
Bone, cancellous, 79, 173
Bone mineral assay: its relation to the mechanical strength of cancellous bone, 79
Bone pin loosening, 3
Bones, 117
Burned tissue, evaporation and heat loss from, 47

Cancellous bone:
material properties of, 173
mechanical strength of, 70
Clinical analysis:
of biological compounds, 60 for, 60
of blood electrolyte cations, 59
Clinical gas analysis, novel electrodes for, 60
Clinical measurement of hand strength, 137, 191
Commode bucket washer, 112
Compression hosiery, 155
Compressive creep behaviour of irradiated ultra high molecular weight polyethylene at 37°C, 85
Computer graphics, 89
Conference report. Third International Symposium on Surface Topography and Spinal Deformity, Oxford 27 and 28 September 1984, 107
Coupling between lateral bending and axial rotation, influence of spine geometry on, 167
Cryounit, liquid nitrogen, 208

Damage risk criteria, theoretical determination of, for impulse noise, 161
Design of intramedullary femoral stems using computer graphics, 89
Diabetic control system, 207
Disc, intervertebral, 43
'Droopsnoot' chair, 205

Effects of medio-lateral rotation on stresses in an artificial hip joint, preliminary study of, 39
Electrically powered forearm, 63
Electrode materials, 60
Electronic devices for rehabilitation (Book Review), 157
Endoscopy system, 111
Environmental factors, influence on evaporation and heat loss from burned tissue, 47
Evaluation of oral water irrigation devices, 141
Evaporation from burned tissue, influence of environmental factors on, 47
Experimental measurement of rotatory and translatory instability of the knee joint, 123
External fixation, fracture healing assessment with, 13

Femoral cement stress, experimental study of, 133
Femoral stem, 133
Fixation, external, 13
Fixator stiffness, 3, 21
Forearm, electrically powered, 63
Fracture healing assessment, 13, 21
Fracture healing assessment with external fixation, 13

Future developments of medical sensors, 59

Gamma camera, 206
Gas analysis, clinical, 60
Geomedic® knee joint, 69

Hand assessment, a microcomputer-based system, 137, 191
Hand strength, measurement of, 137, 191
Hearing aids, 110
  for the profoundly deaf, 153
Heat loss from burned tissue, influence of environmental factors on, 47
Heat pads, electronic, 207
Hip joint, artificial, 39
Hip joint disease, measurement of movement in, 179
Hip replacement, total, 133
Human intervertebral disc, response to loading, 43
Hyperbaric oxygen therapy, 154

Impulse noise, theoretical determination of damage risk criteria for, 101
Instability of the knee joint, experimental measurement of, 123
Intervertebral disc, human, 43
Intramedullary femoral stems, design of, using computer graphics, 89
Irradiated ultra high molecular weight polyethylene, compressive creep behaviour of, 85

Joint mobility, 75
Joints, 39, 69, 95, 109, 117, 123, 133, 179

Knee joint, 95
  Geomedic®, 69
  metal, 109
  rotatory and translatory instability of, 123

Langmuir-Blodgett films, 60
Laser, surgical, 111
Lateral bending and axial rotation, coupling between, 167
London School of Prosthetics, 205
Louisiana Technical University, biomedical engineering at, 147
Low shear rheometry system, 65

Magnetic Resonance in Medicine, Society for, 153
Material properties of cancellous bone in repetitive axial loading, 173
Measurement of movement in hip joint disease, 179
Measuring devices for studying joint mobility in the normal population, 75
Mechanical strength of cancellous bone, 79
Medic Design Awards, 63, 109, 155
Medical gases, monitoring of, 155
Medical sensors, future developments of, 59
Medio-lateral rotation, effects of, on stresses in an artificial hip joint, 39
Meniscus, model for function and failure of, 117
Metal knee joint, requirements for, 109
Microelectronic chemical sensors for clinical analysis of blood electrolyte cations, 59
Microsurgery, new aid for, 112
Modular medical wall, 64
Moving image analyser, 111
Muscle forces, 95

Naidex '85, 208
Nephroscope, 65
New electrode materials, 60
New materials in biomechanics – bones, joints, and teeth, 117
Notes on materials used for Langmuir-Blodgett films, 60
Novel biosensors for clinical analysis of biological compounds, 60
Novel electrodes for clinical gas analysis, 60

Operating lamps, 64
Ophthalmology, titanium instruments for, 109
Oral water irrigation devices, evaluation of, 141
Oxford External Fixator, 3, 21

Patient monitor, 206
Pregnancy, 95
Prosthetic and orthotic training programme, 153
Prosthetics, London School of, 205

Report of a workshop on biosensors in medicine: 24–25 November 1983, 55
Response of human intervertebral disc to loading, time dependent study, 43
Rheometry system, low shear, 65

Simulation of tendon transfer surgery, 31
'Skin' for artificial limbs, 111
Society for Magnetic Resonance in Medicine, 153
Soft materials, viscoelastic properties of, 127
Spinal deformity, International Symposium on (Conference Report), 107
Spine geometry, 167
Static experimental stress analysis, 69
Sterilizable thermoplastic, 208
Strain gauges, 69
Stress analysis, experimental, 69
Stride length, 101
'Superloo', 153
Surface topography, International Symposium on (Conference Report), 107
Surgical implants, care and handling of, 109
Surgical laser, 111

Teeth, 117
Television, teaching by, 66
Tendon transfer surgery, simulation of, 31
The influence of environmental factors on evaporation and heat loss from burned tissue, 47
The influence of spine geometry on the coupling between lateral bending and axial rotation, 167
The Oxford External Fixator: fixator stiffness and the effects of bone pin loosening, 2
Theoretical determination of damage risk criteria for impulse noise, 161
Thermography, 155
Thermoplastic:
  shin piece, 63
  sterilizable, 205
Third International Symposium on Surface Topography and Spinal Deformity (Conference Report), 107
Time dependent response of human intervertebral disc to loading, 43
Titanium instruments for ophthalmology, 109
Torque-release spanner, 205
Training programme, prosthetic and orthotic, 153
Transducers, biomedical, 61

Ultra high molecular weight polyethylene, irradiated, 85
Ultrasonic therapy equipment, 207

Viscoelastic properties of soft materials, 127

Walking speed, 101
Wheelchair, lightweight, 208
Wheelchair restraint, 153
